

**AMENDMENTS TO THE DRAWINGS**

Please replace Fig. 1 with the Replacement Sheet enclosed herewith in Appendix A. Fig. 1 has been amended to correct a minor error. In particular, according to the Specification, the position number 4 is called "optical fibers". From prior Fig. 1, however, it can be seen that the line extending from element 4 actually extends to a lens which is part of the projection optics 7. The line extending from element 4 should rather be drawn to the top of that portion of projection optics 7 to indicate the location of the suitable filters 4. Thus, the current Replacement Sheet amends Fig. 1 accordingly. An Annotated Sheet has also been included in Appendix A to point out the changes made in the Replacement Sheet.

No new matter was added by any of the above amendments.
